Wood House Homes - Working For You

Custom 6x12 Log Home with Edge Chamfer for a rustic Antique look.

The economy, banking system, real estate market and residential construction industries are in a state of near collapse. The log home industry, as part of the construction industry, is facing the same challenges as the residential construction industry.

On the positive side, interest rates are at their low-

est in years, construction material prices are falling across the board, sub contractors are reducing prices to get work, and as a result, from the buyer's point of view, circumstances could hardly be better.

Although the economic and housing industry woes are depressing demand today, Wood House Homes has decided to aggressively seek new business. We have been recognized for many years as one of the lowest priced, highest quality suppliers in the industry.

With substantial discounts on our Log & Mill Material packages, we hope to attract those clients who are prepared to take advan-

tage of the positive elements of today's market. If you are planning on building your log or timber frame home this year we encourage you to contact us now to learn why you should purchase your log home or timber frame package from Wood House Homes, and why you should do so now to take advantage of the substantial savings we are offering.

We are offering unprecedented discounts for a limited time on top of the favorable aspects of today's market to encourage you to move forward with Wood House Homes.
